

****Someone put a spreadsheet of all the class data from Banweb into the discord under resources, this is what we will be using to build our website**

Goal: creating enough proof of concept to provide to banner so they invest effort into the program

Degree Audit Research:

- business core
- electives
- are there exams

Hass Interest Research:

- humanities
- social sciences

Timing Issues Research:

- open classes
- days, times, professors

Professors Research:

Directory link to export data: <https://www.mtu.edu/directory/>

For Implementing Filters in UI:

[Web Filters Checklist: Strategic Conversion Optimization | Turumburum.com](#)

Do we want both sorting and filtering? How do we want the classes to be displayed (in what order)

What do we want the filters to be? How can we break them down? What sub-sorting would we want in the filters?
